

## PON CAD sw for Successful Scaffolding Projects

### Scaffold designed with **PON CAD** Software

**CONDOR** designed the Scaffold for the Shoring of the  
Metro of Naples - Italy

**Subject:** Metro Station of Chiaia, line 6

**Location:** Naples - Italy

**Objective:** The project involves the construction of the "Chiaia" Metro station of Naples, 11 km long.

**Type of scaffolding:** MULTICOM Shoring Towers

**Details:** It were used shoring towers for the construction of the floors with a thickness of 1.20 m up to 2.70 m and of various heights of shoring up to 25 m.

CONDOR has been working for more than 30 years in the design, production, sale and rental of scaffolding, formwork for walls and slabs, trench lining for safety in excavation works, as well as structures for entertainment events, such as stages, grandstands and covered areas.
