

Cutting-edge Scaffolding in Milan - Italy

Design by [PERCASSI COMPANY](#)

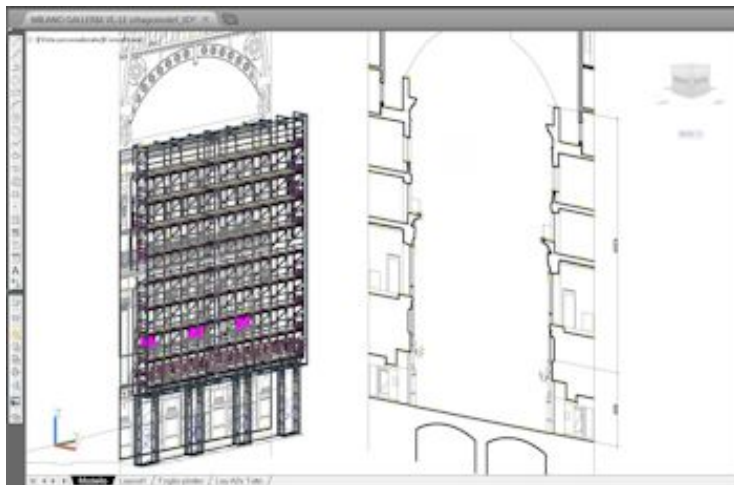

The restoration project of the **Galleria Vittorio Emanuele in Milan** is currently underway: the works have been awarded to PERCASSI COMPANY, which has won thanks to an innovative approach.

[E.P. PONTEGGI](#) has provided the scaffolding and executed the design of the scaffold with the [PON CAD software](#).

The designed scaffolding reduce to a minimum the discomfort for the audience: the solution found is a self-propelled self-supporting gantry scaffolding, without anchors.
