

## PON CAD sw for Successful Scaffolding Projects

### Scaffold designed with **PON CAD** software

**ALUSTAR** designed and installed the Scaffolding of  
the Airport Terminal in Bergen-Norway

**Subject:** Airport Terminal of Bergen - T3 Flesland

**Location:** Bergen - Norway

**Objective:** ALUSTAR designed and erected the scaffold required for the completion of the new Airport Terminal in Bergen.

**Type of scaffolding:** Birdcage - Alustar Aluminium Scaffolding System

**Difficulty:** the roof above was curved and it was necessary to use a rolling scaffold on top of the scaffold in order to reach all areas, and the railway track underneath could not be blocked.

**ALUSTAR** is a Norwegian company that operates on the Aluminium Scaffolding production activity. The Aluminium system allows to design and manufacture innovative solutions for the Building, Construction and Industrial Maintenance industries.
